DESCRIPTION
On the eccentric bushings the center points of the inner and outer cylinders are not the same. As a result it is more flexible in the direction of the main load and it keeps the same control in the other direction.
The eccentric bushing is available in two hardnesses, 45 and 60 sh.

TECHNICAL CHARACTERISTICS
- Optimal vibration damping and isolation.
- Fit to use for robust and safe constructions.
- Simple installation and application.

APPLICATION
The AMC MECANOCAUCHO® eccentric bushing is best suited to the following situations and applications:
- Tilting cab suspension.
- Suspension arms.
