**DESCRIPTION**

The SCBR elastic mounts are elements that work on the basis of compression since thanks to their design and assembly they provide an anti-rebound effect, thus permitting safety assemblies.

Moreover it contains a metallic part, that avoids a premature wear by friction between the rubber and the housing of the mount.

**ADVANTAGES**

The inside stop effect makes them very recommendable for safety purposes.

- Easy to assemble.
- Simple and economical product.
- Wide range of loads.
